## PENTA-HYPNOL®

---

Injectable Solution  
General barbituric anesthetic

## Formulation

---

Pentobarbital sodium 65 mg, excipients q.s.ad. 1 mL

## Indications

---

Short-acting barbiturate anesthetic. Depending on the dose, it induces sedative, hypnotic and general anesthesia effects in small species (surgical procedures lasting up to 2 hours). As sedative or hypnotic in big species. In overdose it can be administered as euthanasic. Also indicated for handling convulsive states caused by poisoning, puerperal eclampsia, epilepsy, among others.

## Dosage and Administration

---

Dogs and cats: 1 mL/2.5 kg of b.w.; cattle and horses: 1 mL/15 to 65 kg of b.w.; pigs: 1 mL/2.5 kg of b.w.; goats and sheep: as sedative or inductor of anesthesia: approx. 24 mg/kg of Pentobarbital sodium, with a range of 11 - 54 mg/kg. Apply through intravenous route.

## Commercial Presentation

---

Bottle x 50 mL,

## SENASA Registry
